Photoshop

Mar - Oct 2021

Customer Success Manager (Technical) at Maestro

Worked with clients of our Loop SaaS product to convey feature requests and bugs to developers. Scripted bulk content management requests using NX, NestJs and Python. Updated roster import scripts. Wrote a custom standalone Angular app to track sales goals for a client. Managed and responded to help desk tickets. Wrote custom database queries to fulfill customer reporting needs (Postgres).

Jan - Aug 2020

Senior Developer at Area 23 (Contract)

As a freelance developer for this award-winning ad agency, I've worked on everything from PHP sites built on Laravel to dynamic animations using SVG, SCSS, and JavaScript.

Oct 2019 - Jan 2020

Software Engineer at Code Pros (Contract)

With Code Pros, I worked on updating and maintaining several websites built on legacy versions of the PHP framework CodeIgniter. I also participated in front-end development with vanilla JavaScript and CSS.

2015 - 2019

Senior Software Engineer at Kipsu

I worked as a full-stack developer to enhance and facilitate our messaging platform. The back end was built with PHP and the front end used Knockout. Embedding web chats on our client pages and customizing them to their specifications was one of my primary duties.

2014 - 2015

Software Engineer at Calabrio

Rebranded our software according to brand recommendations from outside design/marketing company. Worked with HTML, CSS (SASS), and JavaScript (Dojo) to implement new UI/UX designs. Progressively developed feature enhancements for each new software release.

2013 - 2014

Front End Developer at Media Logic Group

Created a mobile app with a REST API using Ember.js and Phonegap. Collaborated on the development of a new version of Aeris API using Backbone.js.
